

# Example of Bill of Lading for shipping batteries on Northland Barge

Shipper's Complete Name, Address, and Phone Number (the Shipper is you – the entity sending the material)

Consignee's Complete Name, Address, and Phone Number (the Consignee is the person who will be accepting the waste (the recycler or whoever is taking the material))

Enter the number of pieces you are sending and then describe the package (for example 4 totes, 2 buckets, etc)

HM stands for hazard material so put an X if the material is hazardous. Batteries and fluorescent lights are considered hazardous. Electronic waste (computers, tv's etc) would not be considered hazardous.

Describe what the material is (for example household batteries, light ballasts, used oil or whatever it is).
